

VIEWPOINT SYSTEMS ANNOUNCES EXPANSION

ROCHESTER, N.Y., June 22 – Viewpoint Systems, Inc. today announced a significant growth initiative with the formation of a new division, Viewpoint Data Management. The new division will offer knowledge management solutions for test data, building on the company’s successful track record of providing industry-leading test and measurement software solutions.

David M. Smith, co-founder and partner of Viewpoint Systems, will head the new division. “Our customers have requested a solution that integrates their test data across multiple platforms, locations and processes” Smith said in explaining Viewpoint’s decision to expand. The Data Management division already has six employees and expects to hire eight more in the coming year. Viewpoint headquarters in Rochester have been expanded to accommodate the growth. Smith expects to announce the first Data Management offering later this year.

About Viewpoint Systems:

Founded in 1992, Viewpoint offers expertise in test software and systems, custom electronics instrumentation, real-time control and data management. Customers include General Electric, Carrier, Moog, General Motors and Borg Warner. Viewpoint is a National Instruments Select Integrator, operates a National Instruments Certified Training Center and is a Gold and Silver Tier member of the Control System Integrators Association (CSIA).
