

MANUFACTURING TEST VENDOR FAIR

FIND THE SOLUTION THAT WILL GET YOUR WORK NOTICED!

Join us for lunch and attend this **FREE** event showcasing the latest products from premier manufacturing test vendors.

WEDNESDAY, NOVEMBER 12, 2008
11:00 am – 1:30 pm

Hosted by:

Viewpoint Systems
800 West Metro Park, Rochester, NY
www.ViewpointUSA.com

To register, **call 585.475.9555** and ask for Carol or email **vendorfair@viewpointusa.com**.

If you pre-register for this event, you will automatically be entered to win a door prize.

Walk-ins are welcome!

ASK QUESTIONS.

LEARN ABOUT NEW PRODUCTS.

SPEAK WITH INDUSTRY EXPERTS.

FIND A SOLUTION.

View product demonstrations and learn about the latest technologies from:

**Advanced
Motion
Systems, Inc.**

Advanced Motion Systems provides electronic and mechanical motion control solutions for a wide spectrum of applications from basic, low cost speed and position control requirements to extremely complex submicron positioning applications. AMS also provides Machine Vision and traceability solutions for industry.

Featured products include: Motion, Cognex Vision

Agilent Technologies

Agilent Technologies, a company well known for innovative test and measurement products, will be showcasing some of their newest instruments. Learn about state-of-the-art advances, from their award-winning DC Power Analyzer to the latest generation RF Signal Analyzer. Agilent Technologies uses its diverse set of skills and technologies to produce effective solutions for your day-to-day challenges. Come see some great tools that will help you maximize the value of your engineers' time and talents.

Featured products include: DAQ, Standalone instrumentation, RF

Great Lakes Controls
 OF New York, LLC
Applying Technology To Industry

Great Lakes Controls of NY is a value added distributor of industrial automation, controls, motor drives and motion products. Great Lakes Controls is the WNY distributor of Siemens PLC products.

Featured products include: Siemens PLC, Test Stand Fabrication

**NATIONAL
INSTRUMENTS**

National Instruments (NI) is a leading provider of PC based software and hardware for Test, Control, and Embedded Design applications. NI has changed the way engineers and scientists approach measurement and automation. Leveraging the PC and its related technologies, virtual instrumentation increases productivity and lowers costs through easy-to-integrate software and modular hardware. NI offers a wide range of hardware products and development software packages to accommodate most form factors, operating systems, and measurement ranges.

Featured products include: DAQ, Motion, Vision, RF

**VIEWPOINT
SYSTEMS**

Viewpoint is the glue that pulls it all together. As a nationally recognized solutions provider, we integrate the best-in-class products in systems that address your specific needs. Our expertise covers test software and systems, custom electronics instrumentation, real-time control, and data management.

Featured products include: Complete System Integration, Custom Instrumentation, Training
