

Government Capability Statement

Viewpoint Systems, Inc., **engineers and fabricates custom automated test systems for product design validation and manufacturing.** We've delivered over 2,000 test systems. We focus on industries regulated by FAA, FDA, and DoW Acquisition, where stringent compliance demands precision and reliability.

As an NI (National Instruments) Partner with certified experts, we leverage industry-standard platforms while adding custom electronics to extend COTS-based solutions. We excel at upgrading and reverse-engineering obsolete test systems, working closely with our clients' engineering teams to extract and preserve institutional knowledge. ITAR registered and ISO certified, Viewpoint delivers the systems that test the products our customers, the warfighter, aviation, and aerospace personnel can trust.

Differentiators

- National Instruments Gold and Platinum Partner for 30+ years
- Measurement hardware selection expertise (sensors, signal cond., DAQ)
- Electronics design and build for challenging acquisition needs
 - e.g., FPA/ROIC imaging and RADAR
- Design for lifecycle management
- Experts with LabVIEW, TestStand, .NET, ASP.NET Core, WPF, MAUI, EF Core

Core Competencies

- Turnkey delivery for new test systems and modernizing legacy test systems
- Acquisition and control hardware deployment combined with LabVIEW, TestStand, and C#.NET
- Custom PCB, connectivity, and harness design and build
- Long-term machine shop partners

Past Performance

- 32+ years providing systems for BAE, General Dynamics, L3Harris, Lockheed Martin, Northrup Grumman, RTX
- 2000+ test systems delivered
- Legacy upgrades to obsolete test systems and custom electronics
- Extensive capabilities in air and space actuators and valves
